

Managing PAM

Designed by the NHS for the NHS

With PAM no-one can hear you scream
It doesn't need to be this painful

Sound familiar?

Managing 42 SQAs across six domains with a variety of stakeholders and supporting evidence via a spreadsheet is difficult. Using a spreadsheet doesn't typically encourage task delegation and collaborative working. Spreadsheets frequently get locked, lost or deleted.

PAM should be about continuous improvement, not just completing a spreadsheet.

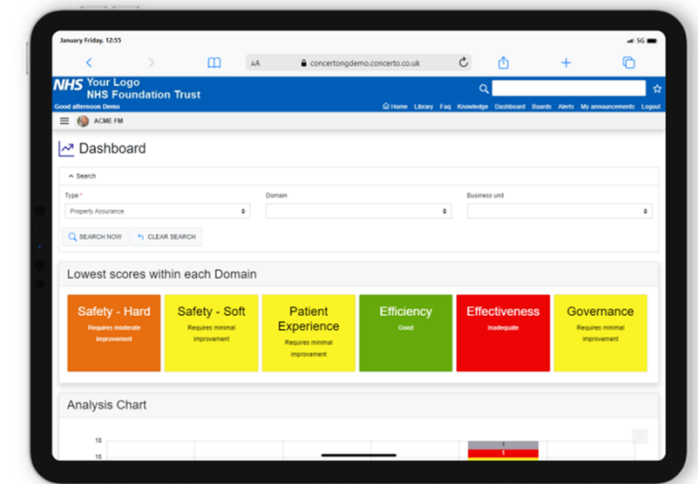

Managing PAM the easy way

Concerto is trusted by NHS Trusts to manage all estate and facilities information and processes.

The PAM module has been developed in partnership with Manchester University NHS Foundation Trust:

- Import your previous submission
- Enables you to see a real time view of compliance
- Aligns directly and outputs against the PAM standard SAQs
- Manage risks and actions across multi disciplinary teams
- Support the timely submission of PAM information
- Track progress and improvement over time (monthly, quarterly, annually) for internal board meetings.

Developed in Partnership with  **Manchester University**
NHS Foundation Trust

Why Concerto

Simple procurement through SBS (Hard FM 2) framework.

Meets industry required security controls (MFA) and A+ Rated by independent security experts.

A small summary

This is sample text it is here to show how this document will look.
